

# Belvac Production Machinery Technical Bulletin

Information for Customers Operating and Maintaining Belvac Machines

ISSUE 9, VOLUME 10, NOVEMBER 2007

## New Main Turret Bearings, 595 Series Necker Machinery

In March 2007, our bearing supplier informed Belvac the main turret, operator side bearing cartridge part number C22798 was being discontinued by the manufacturer. Thru a collaborative effort between Belvac and our supplier, a direct replacement was found.

The bearing housing assembly "looks" slightly different, but remains a direct interchange.

When ordering this bearing, continue to use part number C22798: the latest revision will automatically be provided.

*Contact Belvac Sales or Service Representatives for additional information.*
