Information for Customers Operating & Maintaining Belvac Machines

ISSUE 07 VOL. 4 OCTOBER 2001

## LUBRIQUIP INJECTOR UPGRADE

Belvac has introduced an injector upgrade for all 595K, fixed base and modular machines, directly replacing the SL33 Lincoln Injectors. The upgrade affords ease of maintenance allowing future injector replacement without disassembly of turret components.

Each kit comes complete with grease tubes, elbow adapter with indicator, and injector, metered and preset for the specific application. The injectors in these kits have been factory set to meter the correct amount of grease for that specific application.

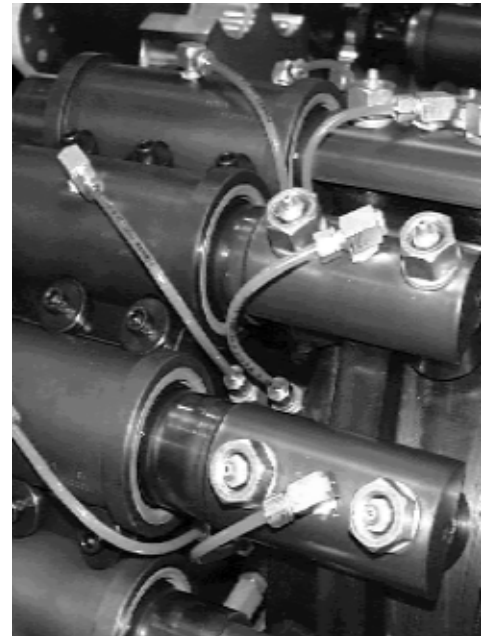

### The Lubriquip Injector Upgrades are ordered as follows:

***P/N 2752187:*** CAM FOLLOWERS INJECTOR KIT

***P/N 2752188:*** RAM BUSHINGS INJECTOR KIT

This design offers the same functionality, and installation, with the following attributes:

- .. Installs to existing turrets without turret disassembly
- .. Indicator is mounted on ram/bushing in plain view
- .. Requires no turret modifications
- .. Replaces individually as needed

This feature will be standard on all new Belvac 595K modular machinery effective January 2002.
